

QuickApprove

Hands off buyer-vendor approvals at the speed of AI

Want to See Something That Scares PMs?

Subject: Re: Re: Fwd: Re: Vendor SOW – 4 Weeks Overdue

Sound Familiar?

Initial Agreement

Consensus is reached in meetings. Everyone agrees on the plan—until it's time to act.

Sudden Stall

Approvals stall. Weeks pass in limbo as decisions await sign-off

Chase Mode

Teams burn time in follow-ups, repeat discussions, and redundant documentation reviews.

Lost Value

Delays compound. Projects miss critical windows. Execution suffers along with stakeholder confidence

QuickApprove - VMaaS with AI-agents

SOW Creation & Automatic Engagement

AI-assisted writing and smart follow-ups by integrating with existing systems for faster approvals

Super Smart Q&A

Built in SME of your projects to answer questions instantaneously

Spend Tracking

Gain complete visibility into project progress, costs, and key metrics via automated reporting

Vendor Performance

Ensure adherence to regulatory requirements and internal policies with AI-driven monitoring and documentation

How QuickApprove Works

Easy Integration

Plug-and-play with Office
365, GSuite, SAP, and
DocuSign

Smart Project Checks

Catch errors before they
slow you down

Managed Version Control

Keep everyone on the
same page automatically

Automated Compliance

Legal peace of mind
without manual review

Our Competition

Features				
Connects to tools of your choice (Office, GSuite, DocuSign)	✓	✓	✓	✓
Customized solution to ensure adherence to compliance and regulatory policies			✓	✓
Customized solution to ensure adherence to compliance and regulatory policies				✓
Autonomous follow ups on Approvals without human intervention				✓
Smart Project Checks to ensure accuracy				✓
Clear Data Insights				✓

How QuickApprove Drives Value

\$200B+

Annual Spend

Spent on vendor services in
mid-to-enterprise organizations.

Weeks

Time Lost

Approvals cost teams weeks per
project.

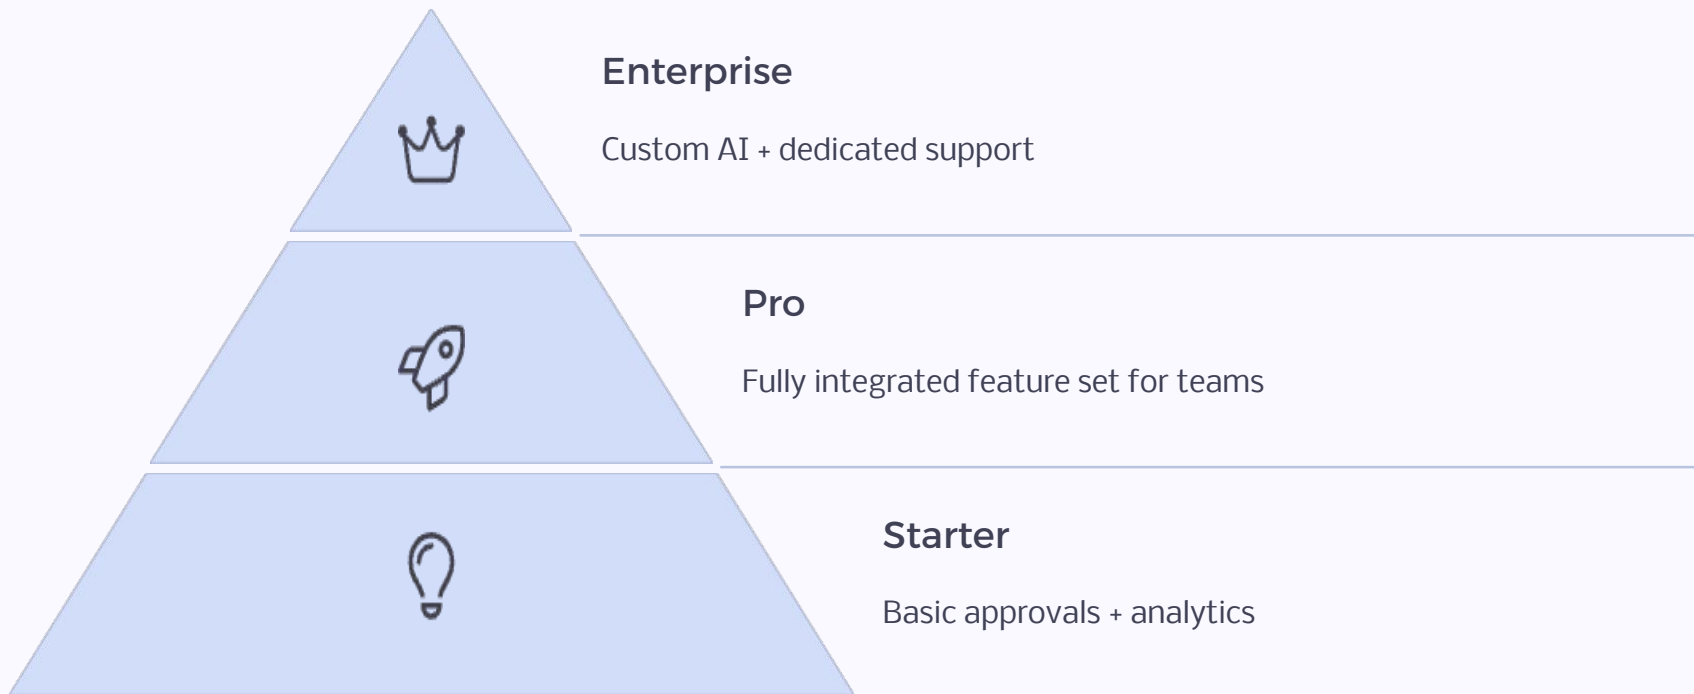

Growing Demand

Increasing need for workflow
automation and AI tools.

Legacy Industries Ripe for Disruption: Retail, Entertainment, Financial Services, Manufacturing

Business Model

Isolated by design. Our AI operates in a secure, sandboxed environment—processing only your organization's data no matter which model you choose from. All deployments are fully segmented to prevent cross-tenant access, ensuring your data remains private, self-contained, and never shared with third parties or external models

The Team

Experienced technical managers at Fortune 500 companies with experience as founders in the financial tech space who have a proven history of working with this problem and driving results
